

KO 1846

An easy solution for a big problem

Worldwide sales and service network provide timely and reliable support to all questions.

SRT module with
Cummins HPI timing
controls

Solenoid Reaction Time Module

**Independent
solution provider
for diesel
injection problems**

Including Timing Controls
for Cummins HPI

KO1846 is the simulator for detecting the start of injection with respect to drive signal and capable of detecting and controlling timing of cummins HPI type injectors. It is upgrated version of old KO1751 SRT Module.

KO1846 is capable to detect selenoid reaction time difference for;

- Delphi A1, E1, E3
- Bosch all types
- Caterpillar all types
- Cummins Celect
- Detroit Diesel all types

and now **Cummins ISX and Cummins QSK** type injectors.

Maktest has training centers in 5 locations around the world. Training centers are focused to help customers to stay up to date with new diesel injection systems. Customers are trained for repairing common rail injectors, using special tools and interpretation of test results. Training centers provides continuous support to the customers to help them solve their repair and diagnose problems with diesel injection problems.

repairing the future..
